

$$L_1 = \{ ww^R \mid w \in (a+b)^* \} \Rightarrow \text{even}$$

$$L_2 = \{ wxw^R \mid w \in (a+b)^*, x \in \{a, b\} \} \Rightarrow \text{odd}$$

$$\underline{\underline{L = L_1 \cup L_2}} \Rightarrow \text{all palindromes over } \{a, b\}$$

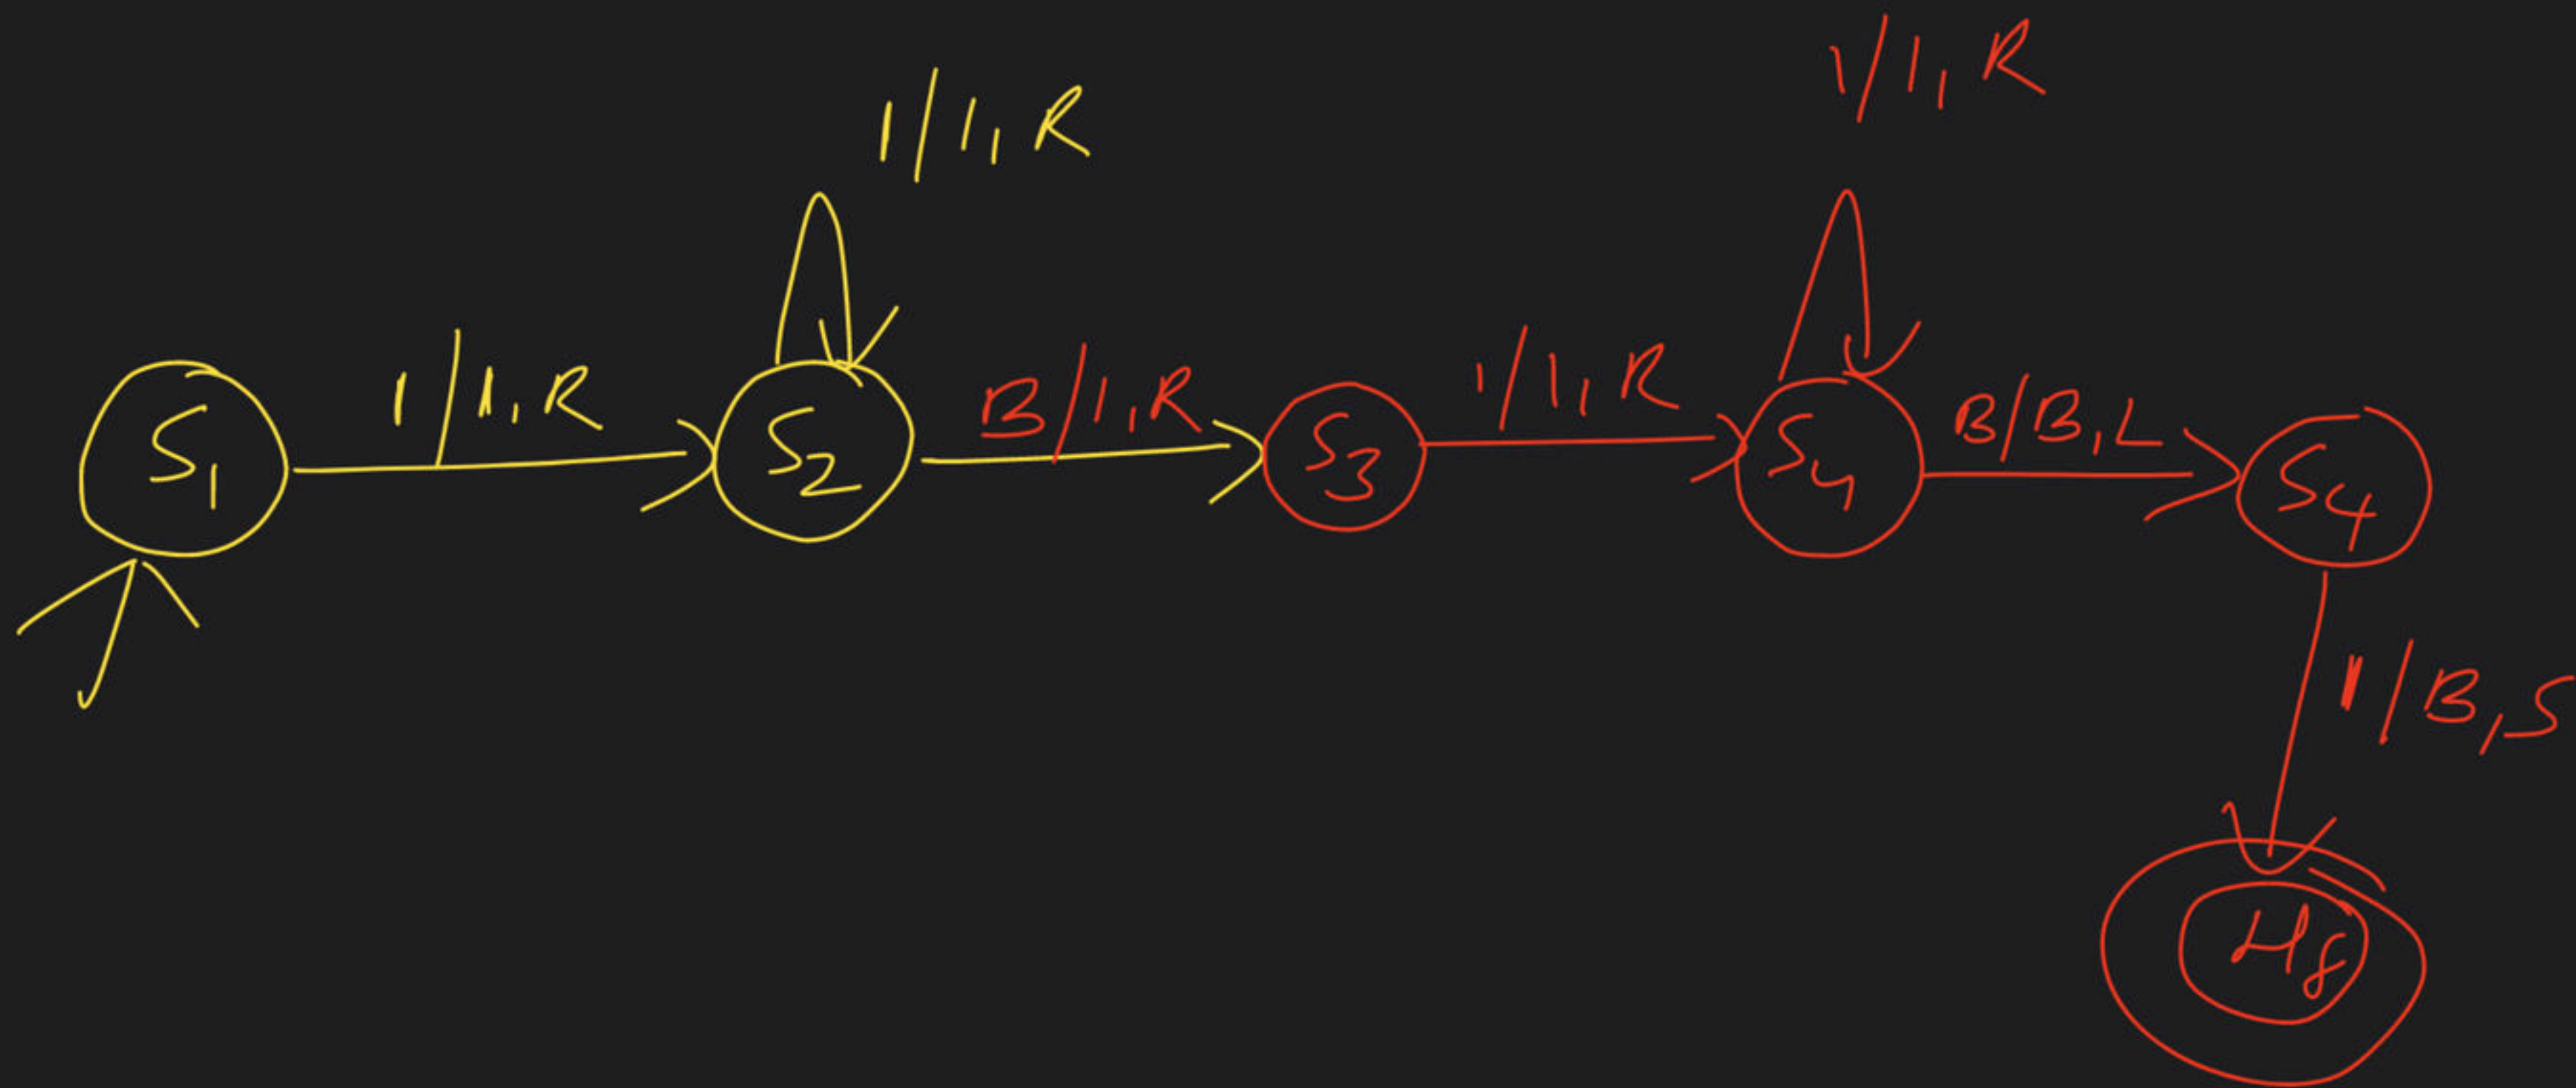

$$L = \{ ww \mid w \in (a+b)^* \}$$

Construct TM to perform addition of two integers $m \geq 1, n \geq 1$.

TM as a Transducer //

HM

Subtraction of two number $m, n \geq 1$ ($m > n$)

Multiplication " " " " ($m > n$)

Division

$$2^4 \Rightarrow 25$$

we find out in time

$$10 - 2 = 8 \Rightarrow$$

$$8 - 2 = 6 \Rightarrow$$

$$6 - 2 = 4 \Rightarrow$$

$$4 - 2 = 2 \Rightarrow$$

$$2 - 2 = 0 \Rightarrow$$
